

FusionCharts
Data to delight...in minutes

CORPORATE PROFILE

Pallav Nadhani
CEO & Co-founder

The world abounds in data, but is short on information. It is only through proper visualization of data that we can have powerful actionable information in our hands.

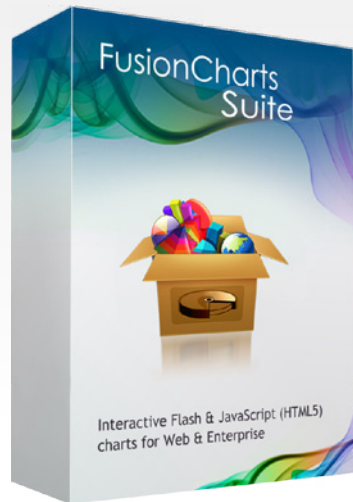

It was with these thoughts that FusionCharts was born. We identified data visualization as our niche and pioneered Flash charting a decade ago.

Our core objective is Making data visualization a delightful experience for all and today we have 14 products focusing solely on data visualization. Apart from charts, we also provide maps and gauges, and have come out with vertical solutions across numerous platforms. We now have over 19,000 customers and 400,000 users in 110 countries, including 80% of the Fortune 500 companies.

Through our flexible licensing schemes and emphasis on customer support, we have been able to form strong relationships with ISVs and large corporations alike. We also enjoy a healthy relationship with our technology partners and resellers.

I invite you to take a look at our corporate profile to see how we can add delight to all your offerings. After all, data is everywhere.

FusionCharts Suite

FusionCharts Suite

The most comprehensive data visualization solution for your web and enterprise applications. It can render over 90 charts and gauges in JavaScript (HTML5) and Flash, along with 550 data-driven maps.

FusionCharts Suite is the industry's leading enterprise-grade charting solution trusted and used by 19,000 customers and 400,000 users in 110 countries, including a majority of Fortune 500 companies and some of the web's most popular sites to add delight to their web and enterprise applications.

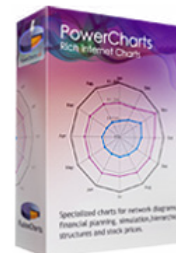

FusionCharts XT

The perfect addition to your reports, dashboards, surveys, monitors and analytics. Its comprehensive range of chart types with smart reporting capabilities, animations and interactivity are bound to make your apps look stunning and power-packed. Leveraging Flash and JavaScript (HTML5), FusionCharts XT functions seamlessly on PCs, Macs, iPads, iPhones and a majority of other mobile devices. It works with both XML and JSON data, and can integrate with any server-side technology (ASP, ASP.NET, PHP, JSP, ColdFusion, Ruby on Rails etc.) and database you use.

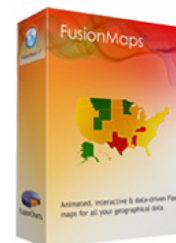

FusionWidgets

Drive actionable insights from all your executive dashboards, live "up-to-the-second" stock monitors, process monitoring applications and financial applications where KPI's and other critical data are monitored in real time. It brings to you the combined experience of programmers and information visualizers in a set of extremely easy-to-use controls.

PowerCharts

Advanced charting widgets for domain-specific usage like in network diagrams, performance analysis, profit-loss analysis, financial planning, stock price plotting and hierarchical structures. The charts are very interactive and powerful, thus helping you add a rich immersive experience to your apps with ease. A number of the charts are visually editable as well so you can use them to plot what-if scenarios, and the edited value can be submitted back to the server.

FusionMaps

Display geographical data distributed by category, regions or entities using animated and interactive Flash maps. You can use it to plot business data like revenue by regions, census data like population by state, election results, flight routes, office locations and survey results effectively.

FusionCharts for Sharepoint

Lets you create interactive charts and dashboards within your SharePoint environment, without ever having to write a line of code. It comes with a wizard based interface that lets you visually install, create and configure each chart. The charts can connect to various data sources within SharePoint like Lists, Views, MS SQL Server, Oracle databases, Excel Services, BDC or even CSV files

oomfo

Brings all the awesomeness of FusionCharts Suite to PowerPoint. Armed with a simple wizard-based interface, it helps you create great-looking animated and interactive charts in minutes. It also gives you advanced capabilities like live data charting wherein you can connect the charts to your ERP and CRM systems, and create special charts like Pareto and Waterfall that PowerPoint doesn't offer.

FusionCharts for Flex

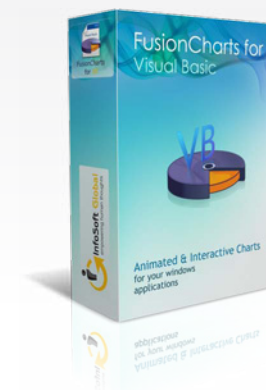

Create interactive charts and gauges in your Flex solutions. It is a perfect addition to your Flex toolkit when building dashboards, reports, analytics or data visualization widgets. Easy to get started, it works with Flex Builder 2, 3 and 4 and Flex SDK.

FusionMaps for Flex

Create interactive and data-driven maps in your Flex applications. It is great for displaying geographical data distributed by category, regions or entities. Ideal usage examples are statistical display of data, flight routes, office locations, election results, survey results or business data like "Revenue by Regions" or "Revenue by states".

FusionCharts for VB6

Render interactive and animated charts in your Visual Basic applications. With the ability to render over 40 chart types spanning both 2D and 3D charts, it can render a pretty face to pretty much any type of data that is otherwise boring. The best part is that it allows you to embed FusionCharts in your Classic VB applications using methods that are already familiar to you. You do not need to know anything about Adobe Flash™ or XML to use FusionCharts for VB.

FusionCharts for Dreamweaver

Helps web developers and designers create animated Flash charts from an easy-to-use Dreamweaver interface. You get 36 web ready chart types which you can play around with to your satisfaction.

FusionCharts for Joomla

Extension that helps users of Joomla 1.5x create charts within their Joomla sites. It provides all the basic chart types you need, which can be configured using an intuitive GUI. This is a free extension.

FusionCharts for FileMaker

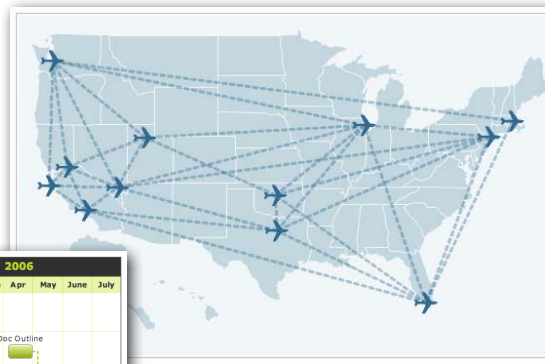

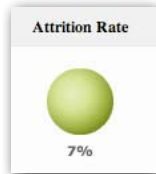

Lets you create animated and interactive charts using FusionCharts inside your FileMaker solutions that can connect to data stored within the solution. The charts are created inside the Web Viewer object in FileMaker. This is a free extension.

You save costs

“FusionCharts has been an integral part of our online productivity application. It has saved our company over \$1 million the first year by giving agents a simple online interface to track their intra-day productivity.”

- Andrew T, Verizon FSC

“My boss purchased a \$30K dashboarding and analytics tool for our company. After several frustrating weeks of difficult setup and programming...I bought FusionCharts for a fraction of a fraction of the cost and was able to generate professional, real-time dashboards with relative ease.”

- Jeff Evans, EFS Inc

You save time

“FusionCharts has allowed us to provide our customers easy visualization of their information. The time it took to integrate was super quick and easy and the results are fantastic.”

- Dan Gervais - CTO, TargetSafety

“FusionCharts makes a mockery of other graph/chart tools. It took our team 10 minutes to put together a PHP API.”

- Nic Skitt, Q Web Development Limited, UK

You get REAL support - quick and reliable

“Thank you for all your help!! This is what I call GREAT customer service. I am very glad Dell decided to purchase this product as your help has made it worth every penny.”

- Ryan Jeffords, Dell Financial Services

“Not only is the product good, but the customer support is brilliant too! E-mailing my original questions on a Saturday evening expecting to receive a reply the following week, I received a reply within minutes! Every question I asked was answered in full, and within a very short time!”

- David Mytton, Managing Director, Olate Ltd

You will have no development worries

“You’ve got a really great product here, by far the easiest graphing solution I’ve ever worked with.”

- Mike Cherichetti, Renegade Internet

“The charts are professionally done and can easily integrate in any web application. I no longer use server-generated charts because I haven’t run across a limitation in FusionCharts yet.”

- Mario Rodrigues, Webauthor.com, US

You get the “wow” factor

“This product is amazing! Beautiful, customizable, animated graphs that take XML input. PERFECT! I’ve been wowing my customer all week!”

-Travis Neale

“Makes my application look like a million bucks!”

- Andrew Loyer, Loyer TCG, Inc., US

You come to us for products. You walk back with an experience

“FusionCharts produces not only eye catching results, but a comprehensive client experience that satisfies analysts and CEOs alike.”

- George Westwater, Algorithmic Ventures

“FusionCharts is an amazing tool with outstanding quality visualizations at an extraordinary price. It adds impact and value to every communication it is used in.”

- Randall Hodges, Bristol-Myers Squibb
